

TH2 ALFALFA

QUICK OVERVIEW

- High multi-leaf expression
- Rapid regrowth
- Superior disease resistance
- Persistence
- Winterhardy

ADAPTATION

TH2 key characteristics are high multi-foliolate expression, rapid regrowth and very good winter survival.

A top performing alfalfa that is well suited for the majority of alfalfa growers/conditions in Western Canada. Its re-growth and leafiness should deliver top quality forage production in many situations.

Consider TH2 in a blend with our similar maturity alfalfas or in combination with grasses.
